Things to keep in mind about the capstone

- Think about a (feasible) question for the capstone.
 - A phenomenon that interests you.
 - Politics → economics (e.g., Elite cues and protectionism.)
 - Economics → politics (e.g., Automation and union power.)
 - Public policy relevance (e.g., mining royalties and test scores.)
- Question must have a contribution to the literature.
- Data to answer the question must exist/be accessible.
 - Proprietary data takes time/money to obtain.
- Start learning an statistical/econometric software.

Things to keep in mind

Once you have a question(s) that you're interested in:

- Look for an advisor.
- Book my office hours.
 - Identify problems with your question.
 - Provide guidance on data, statistics, R and Stata.
- Ask me questions via email.
- Make progress during winter break.
- Don't forget the deadlines!
- Don't wait until the last minute!

Things to keep in mind

Once you have a question(s) that you're interested in:

- Look for an advisor.
- **Book my office hours.**
 - Identify problems with your question.
 - Provide guidance on data, statistics, R and Stata.
- Ask me questions via email.
- Make progress during winter break.
- Don't forget the deadlines!
- Don't wait until the last minute!

- You will need an statistical/econometric software.
- If you do not know any, I recommend to learn R (or Stata).
- Forums, youtube, ask google. (See also syllabus.)
